

Boneshield

Introduction

Smartpak's Boneshield is a material fusion of polyester and wax. It is tough but flexible, allowing suppliers of fresh meats in the food industry added protection for their product. Precision engineering has led to the correct measurements of wax absorption needed during the manufacturing process due to precise calibration techniques.

Boneshield Specifications and Applications

- Clear and coloured high strength PE, medium puncture resistance for retail packs
- A transparent absorbent boneshield available
- A waxed boneshield offering high puncture resistance ensuring extra confidence in retail packs is also available

Smartpak's Boneshield, also known as Boneguard, offers a dual solution of strength and elasticity to ensure maximum shelf-life for vacuum packaged meat and poultry. This innovatively engineered product combines durable strength with ease of use and offers a range of grades to reduce the number of leaks caused by sharp bones.
