

Absorbent Pads

Introduction

The Smartpak range of absorbent pads include meat pads, fruit pads and fish pads available in standard sizes as well as custom made.

We also supply specialised ovenable pads, odour absorbing pads, anti-bacterial pads and ethylene absorbent pads. And as part of our commitment to a sustainable future, Smartak offers a range of compostable and recyclable absorbency pads.

Our absorbent pads are suitable for multiple applications, with the correct level of absorbency required to suit to your exact application.

Cushioned Pads for Soft Fruit

- Cushioned pad prevents bruising
- High level of absorbency
- Increases shelf-life
- Reduces wastage
- Choice of colours available
- Any size, shape or configuration
- FDA and EU approved

Providing the most effective protection for soft fruit, these pads were engineered to optimise shelf-life, reduce damage in transit, add value and offer better product presentation – all at the lowest possible cost.

The embossed pattern elevates the fruit above the surface of the bottom of the container which optimizes airflow. This also inhibits sweating, damage and corresponding fungal growth.

Available in various colours and sizes as well as integrated ethylene absorbency and anti-fungal properties for extending freshness and shelf-life.

Absorbent Pads

Compostable Fruit Pads

- Maximum protection, prevents sweating and bruising and improves product presentation
- Fully compostable films on cellulosic pads
- Cellulosic materials are a derivative of sustainable sources complete with non-GM bio-polymeric layers and constructed using proprietary equipment without the need for glues
- Available in red, black and white
- Supplied as pads or slit reels

Smartpak's compostable pads provide exceptional breathability and cushioning. This is achieved through its innovatively engineered microporous surface which allows air to circulate whilst absorbing excess juices into its cellulosic absorbent membrane.

Absorbent Meat Pads

- Absorbency grades of 10ml and upwards
- Efficient and cost-effective absorbency for meat and poultry
- Standard colours of black and white
- Absorbent meat pads are available in any size, shape or configuration, including slit reels

Smartpak's absorbent pads for meat and poultry, recyclable options available, offer ease of use and enhanced product presentation. Sometimes known as meat soaker pads, they are available in a range of colours, absorbency levels, shapes and sizes to suit all applications. Single-sided or double-sided pads are available.

Absorbent Pads

Absorbent Pads for Fish and Seafood

- Absorbency grades of 10ml upwards
- Efficient and cost-effective absorbency for fish and seafood packaging
- Standard colours of black and white
- Available in any size, shape or configuration, including slit reels

Smartpak's absorbent pads for fish and seafood offer ease of use and excellent appearance to provide cost-effective absorption for food packages. They are available in a range of colours, absorption levels, shapes and sizes to suit all applications. Single sided or double-sided pads are available.

Ovenable Absorbent Pads

- Highly effective absorbency before and during cooking
- Smartpak's ovenable pads can be used in ovens and grills at temperatures of up to 200C
- Reduces consumer handling as meat can be left in the tray
- Providing healthier, crispier and cleaner meals
- Can be used in skin/MAP and thermoformed packaging

These ovenable pads offer effective pre-packed absorbency as well as during the cooking process. Their function is to absorb fat and juices released which result in cleaner, crispier, healthier food. Smartpak's absorbent ovenable pads can be made to custom sizes in order to suit the various tray types. Available in black, white or silver.
