

# 95kPa Specimen Bags

## Introduction

Smartpak's 95kPa absorbent specimen transport bags are engineered to ensure safe and compliant storage and transport of diagnostic and clinical samples, infectious and hazardous materials, chemicals, pharmaceuticals and environmental samples. These independently-certified 95 kPa pressure bags are compliant with all relevant transport regulations including UN3373.

## Smartpak's 95kPa Specimen Bags Specifications and Applications

- Provides effective secondary packaging for clinical diagnostic samples and biological substances
- Able to withstand 95 kPa pressure
- Available in 3 sizes: A4; A5 and A6
- Available with a leak-proof adhesive closure, puncture resistance, and printed tracking information
- With or without document pouch
- Absorbent cushioning layer inside to soak up liquid
- An outer, waterproof film ensures liquid enclosure
- We can also supply 95 kPa bags with a pre-inserted absorbent pad
- Independently tested and verified
